

Release Note 3.0.0

This release note includes the updates to view_hdf since the release of User's Guide Version 3.0.

1.0 Main Menu

- (1) “Settings”: The “Browse Image Plot Type” option is added into this menu, as shown in [Fig. 1-1](#). This option set how a browse image created.

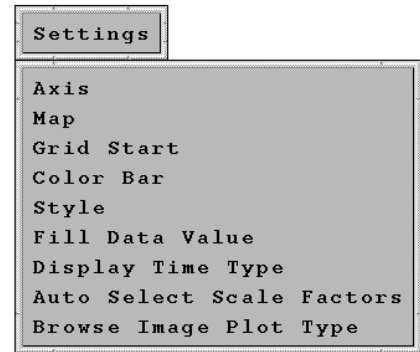

Fig. 1-1. Settings Menu

The two options, as shown in [Fig. 1-2](#), are

- (a) “Plot As Image”: A two-dimensional data set will be converted into two-dimensional uniform gridded data set and displayed the data set as image. This is the default.
- (b) “Plot By Points”: The data set is plotted point by point.
